

14 DRE 42 Sequoia (MF)

Sequoia is Unbelievable's first cria, weighing an amazing 12.1 kg at birth. Even with another full dose of black, Unbelievable still manages to throw an off-white cria. Sequoia is heavy boned and nicely proportioned , with a very solid conformation and dark toenails and gums. Long heavy locks, a bold crimp structure but with considerable brightness and a very nice handle. I have never had a cria weighing over 12 kg before, and it will be intriguing to see how she grows out. And her colouring is unusual too, as Hardy's Stamp is True Black and Unbelievable earned her name from her colour: her sire Tulley was DF and her dam's pedigree is predominantly black back through three generations.
